- JavaScript
- Python
- Spring
- React
- Angular
- Maven
- SQL
- HTML/CSS
- Git/Github

## LANGUAGES

- ENGLISH (C1)
- ROMANIAN (C1)

## ABOUT ME

As a recent graduate programmer, I am passionately seeking a full-stack or web developer position where I can deepen my knowledge further. For me, self-development and professional growth are of utmost importance, and I quickly adapt to new challenges while working effectively both in a team and independently.

## EXPERIENCE

During my internship, I worked as a junior system administrator, where I excelled both in teamwork and independent tasks. My responsibilities included maintaining servers and devices, as well as assisting colleagues in performing their work. Additionally, I had the opportunity to gain insights into the company's web development and robotics projects, which broadened my professional horizons.

## EXTRACURRICULAR ACTIVITIES

**Erasmus +**

I participated in several Erasmus workshops, where I worked both online and offline with students from various countries. These experiences significantly enhanced my teamwork and project management skills, enabling me to successfully contribute to the realization of various projects.

**Student Council**

My involvement in the association, where I took part in the planning and execution of events for different age groups and scales, enriched my ability to earn the trust of team members and effectively accomplish my tasks.

## CERTIFICATIONS

**Certiport Python  - 2024**
IT Specialist - Python

**ECDL Profile Certificat  - 2021**
Microsoft 365

**Certificate of professional competence - 2021**
Program management covering software systems, applications, databases, and web pages.
